

LAND VALIDATION BY PUPR MINISTRY

We are building our project in a pink area which known to be the tourism zoning, where it is allowed to build a building both apartments and villa on that zone. For that we have obtained the validation to build from the Ministry of Public Works and Public Housing of Republic Indonesia.

A little part of our land is located in a Local Protection Zones & Water Bodies, but we build only in the pink zone and left out around 5-6 m from the water bodies, therefore there is no zoning that we violated.
